

S I S M I K

af

Seismic, rhythm and rhythmic
symbolize the deep meaning
of my new collection.

ASTRIG FISTER DESIGNER

In fact, this collection takes its inspiration
from the continuous movement of the earth,
news shapes
in which horizontal
and vertical lines interlock,
as well as materials,
burnt larch wood interacting
with a white gold leaf covering metal.

4 pieces of furniture constitute the set :

Self reflection · MIRROR · Out of sight · SCREEN

Feeling good with myself · CONSOLE · Ready to share · TABLE

3 artists have put their own talent to develop this same theme :

Fabienne Benveniste.

*I paint on large canvases tacked to the walls.
Pigments, inks, pastels, brushes become my spontaneous actors,
my febrile guides, companions in battle within the frame.
This upheaval arouses emotions. In the space of a breath,
the unexpected flow of my inspiration pacifies, leaving in its wake
the sensitive traces of its passage over the canvas.*

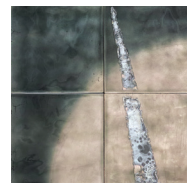

fabiennebenveniste.com/wordpress · fab.benveniste@gmail.com

Christophe Mirande

*Light plays with the different textures of metal, slate or enamel.
The surfaces appear smooth or rough, matt or shiny.
The light is changing, fleeting...
It is the fragility of our perceptions that interests me ; my quest
is to discover the essence of the world by diving deeply into its telluric
and incandescent materials.*

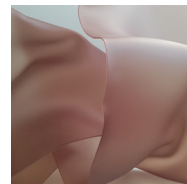

mirande.eu · christophemirande.paris@gmail.com

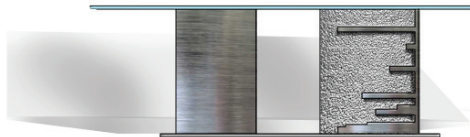

Romain Quattrina

*The fold is the one of the main points of my sculptural practice.
This singular form, that historian of art Henri Focillon said it has
"The value of a writing" is at the same time a pattern and an allegory.
Even if I sometimes use materials as ceramic, copper, oil or water,
I currently focuses on glass and plexiglas.*
